# Picking Up a Call for Another User

Not available on SPA301 or SPA501G

- If you know the extension number:
   Press Pickup . Enter the extension number.
   Press Dial .
- Choose a call from a list of ringing calls at your site: Press the right-arrow navigation button, and then press GrPick or Grpickup. Use the navigation button to choose a call, and then press Dial

#### **Diverting Calls to Voicemail**

- Ignore a ringing call: Press Ignore. The call is forwarded to your Call Forward No Answer number (usually voicemail).
- Prevent new calls from ringing your phone:
  Press Dnd . All calls are forwarded to your
  Call Forward No Answer number (usually
  voicemail). To clear, press Dnd or Clr Dnd

#### **Forwarding Calls to Another Number**

- Forward all incoming calls: Press Forward or Cfwd to forward all incoming calls. Then enter an extension or phone number. Press Dial (not required if you entered an extension).
- Cancel Call Forward All: Press Clr Fwd or -Cfwd .

## **Using the Site Directory**

To find extension numbers for users, groups, and system features, press Dir or Directory.

Use the navigation button to choose a directory. To place a call, select a number, and then press Dial.

#### **Using Feature Buttons**

Your phone administrator may configure feature buttons for your phone. Ask your phone administrator for details.

Not available on SPA301, SPA501G, or SPA502G

- Auto-dial (system speed dial): Immediately calls or transfers a call to the specified extension or phone number.
- BLF (Busy Lamp Field): Monitors the specified extension. Also can be used as an auto-dial (system speed dial).
- Block Caller ID: Blocks your caller ID for a new call.
   Lasts for the duration of the call.
- Park Slot: Places a call on hold in the specified park slot. To unpark, press the same park slot button, such as Park Slot 2, on any IP phone with this button. Note: The call also can be unparked from any phone as described in Parking and Unparking Calls.
- Force Night: The function depends on the Day/ Night settings for your phone system.
  - In a manual day/night system: Press to toggle between Day mode (green) and Night mode (red).

- In an automated day/night system: Press to temporarily override the schedule. The light is red. Press again to resume the normal schedule. The light is green.
- **Intercom:** Initiates a two-way call to the phone speaker of the specified user. To end the intercom call, press the button again.
- Individual Pickup: Flashes to indicate a ringing call on the specified extension. Press to pick up the call.
- Unused Button: May be used for a personal speed dial button.

Press and hold the unused button for 3 to 4 seconds. To enter the Name, repeatedly press the corresponding key on the keypad until the desired letter appears. To erase a character, press delChar. When finished, press the down-arrow navigation button to select the PhoneNo field. Enter an extension or phone number, including any required access code. Finally, press Save.

## **Using Star Codes**

Select a star code from a list:

- Cisco SPA50xG models (except SPA501G): Lift the handset, or select the speaker or headset. Press the right-arrow navigation button until the 
   \*code\* softkey appears. Press \*code\*.

  Press the down-arrow navigation button to select a star code. Press \*code\*. Additional prompts may appear.
- Cisco SPA525G/G2: Lift the handset, or select the speaker or headset. Press Option, and then select Input Star Code. Press the down-arrow navigation button to select a star code. Press Select .
   Additional prompts may appear.
- Enter a code manually (all models): Lift the handset, or select the speaker or headset. Press
   followed by the code. (For details, see your phone user guide.)
